

Nikhil Oke

New York, NY | nikhiloke97@gmail.com | (607) 595-9462 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SKILLS

Programming & Frameworks: Java, TypeScript, Spring Boot, Spring Batch, GraphQL, Resilience4J, RabbitMQ, Kafka
Databases & Cloud: MySQL, MongoDB, PostgreSQL, NoSQL, Oracle, AWS (RDS, S3, API Gateway)
DevOps & Tools: Docker, Kubernetes, Git, GitHub Actions, Jenkins, JIRA, Postman, Open API
Testing & Monitoring: JUnit, Mockito, Jest, Playwright, Prometheus, Grafana, Datadog

PROFESSIONAL EXPERIENCE

PayPal, Software Engineer II | New York City, NY

Apr 2025 – Present

Loyalty Platform (PayPal+)

- Designed and developed **scalable Java/Spring Boot microservices** supporting **tier progression, enrollments, benefits, and offer redemptions** for **1M+ active users**.
- Built and maintained **event-driven transaction pipelines** using **AMQ (Atlas Message Queue)** messaging to process **high-volume reward and financial events** reliably.
- Developed an **end-to-end processing workflow** to ingest and classify **millions of transaction events**, identifying **Direct Deposit users** and determining **eligibility logic** for loyalty rewards and targeted offers.
- Implemented **idempotent consumers, validation layers, and retry mechanisms** to ensure **financial accuracy** and prevent **duplicate reward issuance**.
- Led **API contract** design and service interface definitions across multiple dependent services.
- Reduced **transaction latency by 30%** through **query optimization, indexing strategies, and schema redesign** in Oracle.
- Strengthened service reliability using **Resilience4j circuit breakers, timeout policies, and graceful degradation** patterns.
- Improved **observability** through **structured logging, metrics instrumentation, and alerting pipelines in Datadog**, reducing **MTTR by 60%**.
- Owned **production on-call rotations**, leading **incident triage, root cause analysis**, and reliability improvements to maintain **99.9%+ uptime**.

Ads Platform (PayPal Ads Team)

- Built and scaled **backend ad infrastructure** serving **25M+ daily users**, achieving **sub-100ms p99 latency** and **99.99% uptime** across **globally distributed systems**.
- Led **GDPR-compliant third-party integrations**, designing **user consent validation workflows** and **compliance enforcement layers** for onsite ads in Germany and the UK.
- Developed **high-performance backend services** powering **post-transaction monetization flows** on iOS and Android, contributing to **\$4M+ incremental revenue**.
- Designed and implemented **GraphQL schemas and resolvers**, building an efficient API layer to aggregate and expose ad delivery data across multiple backend services.
- Designed **high-availability ad delivery systems** using **Google Cloud Spanner**, leveraging **global replication** and **strong consistency guarantees**.
- Implemented Datadog observability (metrics, logs, alerts), reducing incident response times by ~60%.
- Authored **technical design documents (TDDs)**, defined **service APIs**, and mentored junior engineers on **backend architecture and production best practices**.

Idea Nova Technologies, Software Engineer | Naperville, IL

Jun 2024 – Aug 2024

- Developed a scalable web conferencing platform, enhancing efficiency and reducing operational costs by **\$50K annually**.
- Established CI/CD pipelines using **GitHub Actions** and containerized services with **Docker**, reducing time by 50%.
- Improved frontend performance by 40% through optimized loading strategies and caching mechanisms.

Select Health, Software Engineer Intern | Salt Lake City, UT

Aug 2023 – Jun 2024

- Migrated a monolithic claims system to a **microservices architecture**, reducing human efforts and **saving \$150K annually**.
- Built **Spring Boot microservices** using **RabbitMQ and Redis**, improving processing time by 30% and throughput by 20%.
- Optimized **SQL Server performance for 4M+ records** using indexing and partitioning, reducing query time by 40%.

We Agile Software Solutions, Software Engineer | Pune, India

Dec 2020 – Jun 2022

- Developed RESTful APIs using **Spring Boot** for workforce management systems.
- Implemented **OAuth2 authentication** and improved backend test coverage to 85% using JUnit and Mockito.

Accenture, Associate Software Developer | Bangalore, India

Sep 2019 – Oct 2020

- Developed and optimized **Spring Boot REST APIs**, reducing system latency by 20%.
- Built analytics dashboards and improved operational workflows using data-driven UI components.

EDUCATION

SUNY, Binghamton University

Master of Science in Computer Science (GPA: 3.85 / 4.00)

Aug 2022 – May 2024

Savitribai Phule Pune University

Bachelor of Science in Computer Science (GPA: 3.30 / 4.00)

Aug 2015 – May 2019
